1 — Problem

BOUNDED EXERCISE • DRAFT ONLY

An unfinished task needs a reviewable next action.

Select one existing unfinished task rather than creating overlapping work.

2 — Method

BOUNDED EXERCISE • DRAFT ONLY

Scope the task, source, destination and permitted actions.

Identify the task's starting revision, intended destination and allowed actions, and retrieve only necessary context.

3 — Evidence

BOUNDED EXERCISE • DRAFT ONLY

Return the artifact, actual checks, limits and checkpoint.

Retain concrete output and observed checks, label unresolved work, and provide a continuation checkpoint. A proposal is not an accepted fact.

4 — Next step

BOUNDED EXERCISE • DRAFT ONLY

Start with synthetic data and a draft-only action.

Use a bounded exercise and review its exact revision. Public actions, spending and account changes require their own authority.

Review decision:

REVIEW CANDIDATE • UNPUBLISHED
